## **Detailed Action**

### ***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Michael Noe (512) 472-7800 on August 3, 2007.

- **Claim 1** – replace lines 10-12 with: -- a two-piece fastener for the case assembly comprising a screw and a nut, the functional unit attached to an electrical connector, wherein both pieces of the two-piece fastener assembly extend through the electrical connector, and wherein the nut is covered by the bumper. –
- **Claim 7** – line 1: “storage medium” is changed to “disk drive”
- **Claim 7** – line 6: “storage medium” is changed to “disk drive”
- **Claim 7** – lines 8-9: “extends beyond a functional unit of the storage medium in the x and z directions.” is changed to “extends beyond an assembly structure of the disk drive in the x and z directions. ”
- **Claim 13**– replace lines 11-12 with: -- wherein a two-piece fastener for the case assembly comprising a screw and a nut, the functional unit attached to an electrical

connector, wherein both pieces of the two-piece fastener assembly extend through the electrical connector, and wherein the nut is covered by the bumper. –

***Reasons for Allowance***

1. Claims 1-4,6,7,9-13,15-17, and 19 (renumbered as 1-15) are allowed.
2. The following is an examiner's statement of reasons for allowance:
  - The prior art does not teach nor reasonably suggest, as recited in **Claims 1 and 13**, specifies a disc reading apparatus, which requires:

***“a two-piece fastener for the case assembly comprising a screw and a nut, the functional unit attached to an electrical connector, wherein both pieces of the two-piece fastener assembly extend through the electrical connector, and wherein the nut is covered by the bumper”.***

These features, in combination with the other features of Claims 1 and 13, are not anticipated by, nor made obvious over, the prior art of record.

- The prior art does not teach nor reasonably suggest, as recited in **Claim 7** specifies a storage medium defining x,y, and z directions and having an assembly structure capable of being detachably loaded into a PC card, which requires:

***“...a connector for insertion in a slot formed in the PC card , the connector having tapered guide features that provide a guiding function for the storage medium relative to the PC card; an elastic member forming an external shape not departing from a form factor that is required in mounting the disk drive to the PC card; and wherein positions of two-dimensional side surfaces of an external shape is dependent on the connector and the elastic member, and the elastic member extends beyond an assembly structure of the disk drive in the x and z directions.”***

These features, in combination with the other features of Claim 7, are not anticipated by, nor made obvious over, the prior art of record.
